Aniket Kiran

Dehradun, India — +91-6207814800 — aniketkrsingh12@gmail.com — LinkedIn — GitHub

Professional Summary

Cloud-focused Computer Engineering student specializing in Cloud Computing & Virtualization with strong DSA and problem-solving skills. Experienced with AWS, Kubernetes, Docker, and full-stack development, with hands-on experience building scalable and cost-optimized cloud solutions.

Education

University of Petroleum and Energy Studies (UPES) — Dehradun, India
Bachelor of Technology in Computer Engineering ***CGPA: 7.58/10*** — *Aug 2023 – Jul 2027*

Technical Skills

Languages & Backend: C/C++, Python, JavaScript
Cloud & Databases: AWS (EC2, S3, IAM, Lambda, CloudWatch), Azure, GCP, PostgreSQL, MySQL
Infrastructure as Code Exposure: Terraform, AWS CloudFormation, AWS CDK (academic/lab work)
Frontend: React.js, Next.js, HTML, CSS
DevOps & Tools: Kubernetes, Docker, Minikube, kubectl, Git, GitHub, CI/CD
Core CS: Data Structures & Algorithms, Computer Networks, OOPS, DBMS

Experience

Pheme Software Pvt. Ltd. (IBM Platinum Business Partner) — Remote
Cloud Engineering Intern (Cloud & DevOps) — *14 Jun 2026 – 19 Aug 2026*

- Built a Minikube-based Kubernetes environment implementing namespace isolation and resource governance across Dev, Test, and Prod environments.
- Enforced ResourceQuotas and LimitRanges to control CPU, memory, and pod allocation, preventing resource contention.
- Deployed workloads using Deployments, Services, ReplicaSets, Labels, and Selectors, including zero-downtime rolling updates.

Punjab National Bank — Muzaffarpur, India
Administrative & Strategic Operations Intern — *Jun 2025 – Jul 2025*

- Assisted with branch documentation, communication, daily operations, and technology-enabled workflows.
- Gained exposure to corporate strategy, management practices, and cross-functional operational processes.

Projects

CloudRec – Multi-Cloud Architecture Recommendation Platform | *Next.js, React, PostgreSQL, AWS, Azure, GCP*

- Built a full-stack platform recommending scalable and cost-optimized cloud architectures across AWS, Azure, and GCP based on user requirements and budget.
- Implemented cloud cost estimation and provider scoring to support cost-aware infrastructure decisions.
- Integrated Google OAuth authentication and interactive dashboards for recommendations and analytics.

Cloud-Based Canary Deployment Simulator | *Python, FastAPI, React.js, PostgreSQL, Docker, AWS*

- Developed a cloud-ready canary deployment simulator to demonstrate zero-downtime releases through progressive traffic shifting between stable and canary application versions.
- Designed an automated rollback mechanism based on real-time error-rate monitoring and configurable failure thresholds to improve deployment reliability.
- Integrated FastAPI REST APIs, PostgreSQL, and a React dashboard, with Docker Compose for containerized service orchestration and deployment management.

Certifications

- AWS Certified Solutions Architect - Associate
- AWS Academy Graduate – Cloud Foundations
- AWS Academy Graduate – Cloud Architecting

Achievements

- Semi-Finalist, UPES Cloud Security Alliance Student Chapter Hackathon 4.0
